

NAOMI BAKR

Senior Product Manager

Irvine, CA • naomibakr94@gmail.com • www.naomibakr.com • (714) 749-7146

PROFESSIONAL SUMMARY

Senior Product Manager who ships across the full range of product work: consumer-facing experiences, agent-facing tools, and the payments, billing, and rating infrastructure that regulated fintech and insurtech companies can't scale without. Started in sales and never lost the instinct for what drives revenue. Builds and ships production software independently, including a live iOS app.

EMPLOYMENT HISTORY

Sr. Product Manager

Mar 2024 - Present

CoverTree - Home Insurance Platform

- Own product end to end across the consumer checkout and billing experience, the agent portal, and core policy issuance, rating, and compliance workflows across all active states.
- Led development of an automated, rules-driven rating engine, reducing state-specific revision cycles from three weeks to under 24 hours and lowering engineering overhead.
- Designed and shipped an AWS Bedrock LLM pipeline with confidence-based routing and human review queues to process bulk-deposited checks, automating 95% of check payments, which account for 50% of all payment transactions.
- Launched end-to-end payment infrastructure via Stripe, including credit card and ACH support, driving ACH adoption to 20% of premium collection and reducing card processing costs.
- Redesigned the policyholder billing portal and agent payment tooling, shipping guided flows for ACH and mortgage-billed policies and real-time payment feedback for service agents.
- Delivered a fully automated local tax calculation system by integrating jurisdiction mapping and tax logic, shipping in three months.

Product Manager

Jun 2021 - Mar 2024

LoanSnap Holdings - Digital Mortgage Platform

- Owned core lending experiences across application, eligibility, pricing, underwriting, and borrower communications in a highly regulated environment.
- Spearheaded the launch of the HELOC product, which scaled to represent over 80% of company loan volume and became a primary revenue driver.
- Built and launched an internal, rules-based pricing engine enabling dynamic rate optimization and improved margin per loan.
- Improved purchase pre-approval retention by identifying drop-off points in Mixpanel and redesigning key decision paths in the user experience.
- Automated borrower communications across SMS, email, chat, and phone using Braze and Customer.io, increasing engagement while reducing inbound support volume.

Sales Team Lead

Jan 2019 - Jun 2021

LoanSnap Holdings - Digital Mortgage Platform

- Led and coached a team of nine sales associates, driving consistent increases in closing and funding volume through targeted training and performance management.
- Recognized with the Rock Award every quarter for highest production, customer experience, and operational consistency.

PROJECTS

Stash - iOS App (Live on the App Store)

Solo builder: React Native, Expo, Supabase, Vercel

- Designed, built, and shipped a product-saving and wishlist app end to end, owning product design, engineering, and release management solo, including a native share extension, cross-device sync with Supabase, image caching, and App Store submission.

SKILLS & TOOLS

Payments & Billing: Stripe, ACH, credit card processing, check reconciliation, invoicing and collections workflows

AI & Automation: AWS Bedrock, LLM/OCR pipelines, confidence-based routing, rules engines (TypeScript)

Product & Analytics: Mixpanel, Braze, Customer.io, Jira, Figma, A/B testing, funnel analysis

Building: React Native, Expo, Supabase, Vercel, Replit, rapid prototyping

EDUCATION

B.A. Business Economics, University of California, Irvine

Jun 2017

Division I Soccer Athlete; Captain, Women's Club Soccer Team
